

# Julio Vinachi

## WEB DEVELOPER FULL STACK

I am a full stack web developer, since 2009 I have been passionate in this world of web development, I consider myself self-taught and I have never stopped learning, from a very young age I always liked to create things, to know how they are made and how to do make them. Where I am, I like to make things happen, make ideas in reality. Very grateful to God, for putting this restlessness and constant curiosity in me, I am not satisfied with saying a I don't know, or it can't be, there is always a way of doing things, if there is no path created, the can been created , in this field of technology there is always something new to learn new languages, new tools and new ways to improve and do things, well that's me.

## PERSONAL INFORMATIONS
